VC37**SCHEDULE 3 TO THE VEGETATION PROTECTION OVERLAY**

Shown on the planning scheme map as VPO3

REGENT HONEYEATER HABITAT/LURG IRONBARK VEGETATION PROTECTION AREA**1.0**19/01/2006
VC37**Statement of nature and significance of vegetation to be protected**

This area provides one of the limited habitat areas remaining of the Regent honeyeater which is listed as an endangered species under the Fauna and Flora Guarantee Act.

The area also provides habitat for Squirrel gliders, Brush-tailed phascogales (Tuan), Grey-crowned babbler, Bush stone curlews and Quools, which are listed as rare or endangered under the Fauna and Flora Guarantee Act.

The area maintains vegetative links between the Warby Range and the Great Dividing Range used as habitat and migratory routes by the indigenous fauna species.

2.019/01/2006
VC37**Vegetation protection objective to be achieved**

To protect and stop the removal of native vegetation in areas that support Regent honeyeater.

3.019/01/2006
VC37**Application requirements**

An application must show the species of native vegetation proposed for removal and measures proposed to minimise the removal of Mugga Ironbark, White Box, Yellow Box and Blakeley's Red Gum all of which support the survival of the Regent honeyeater and the other threatened species.

4.019/01/2006
VC37**Decision guidelines**

Before deciding on an application, the responsible authority must consider the recommendations of the "*Regent Honeyeater Recovery Plan*", Department of Natural Resources and Environment 1997, and the status of vegetation shown on the map series "*Remnant Vegetation of the Lurg Hills*", Sally Mann and Doug Robinson 1992.
