#### Decision guidelines

The following decision guidelines apply to an application for a permit under clause 32.07, in addition to those specified in clause 32.07 and elsewhere in the scheme:

- Whether the development seeks to achieve the development outcomes encouraged through the *Residential Built Form Guidelines, 2014*.
- Whether the development incorporates design measures to maximise rear setbacks from the secluded private open space of adjoining properties in the Neighbourhood and General Residential Zones.
- Whether the mass of the development is located towards the street frontage and provides an acceptable level of visual bulk towards the rear of the lot.
- Whether the building composition provides for a distinguishable base, middle and top and appropriate levels of design treatment to each element, while incorporating consolidated upper setbacks to avoid a tiered 'wedding' cake form.
- The effect of the slope of the site on the height of the building.
- The relationship between the proposed building height and the height of existing adjacent buildings.
- The visual impact of the building when viewed from the street and from adjoining properties.
- The potential and ability to consolidate lots to create large
