

Residential aged care facilities**Objective**

To facilitate the development of well-designed and appropriately located residential aged care facilities.

Strategies

Recognise that residential aged care facilities contribute to housing diversity and choice, and are an appropriate use in a residential area.

Recognise that residential aged care facilities are different to dwellings in their purpose and function, and will have a different built form (including height, scale and mass).

Ensure local housing strategies, precinct structure plans and activity centre structure plans provide for residential aged care facilities.

Ensure that residential aged care facilities are located in residential areas, activity centres and urban renewal precincts, close to services and public transport.

Encourage planning for housing that:

- Delivers an adequate supply of land or redevelopment opportunities for residential aged care facilities.
- Enables older people to live in appropriate housing in their local community.

Provide for a mix of housing for older people with appropriate access to care and support services.

Ensure that proposals to establish residential aged care facilities early in the life of a growth area are in locations that will have early access to services and public transport.

Ensure that residential aged care facilities are designed to respond to the site and its context.

Promote a high standard of urban design and architecture in residential aged care facilities.

Policy guidelines

Consider as relevant:

- The Commonwealth Government's Responsible ratios for the provision of aged care places under the *Aged Care Act 1997*.
