C161**SCHEDULE 2 TO THE VEGETATION PROTECTION OVERLAY**

Shown on the planning scheme map as **VPO2**.

HILLS TOWNSHIPS**1.0**28/05/2015
C184**Statement of nature and significance of vegetation to be protected**

The Hills Townships contain substantial areas of remnant indigenous, and mature exotic vegetation, which are important elements of the character of these residential areas. This vegetation is often of environmental or landscape significance due to topography and view lines and contributes to the visual amenity of these areas.

Some residential areas contain remnant native vegetation, however due to the size of some lots, it is not protected by the native vegetation controls in Clause 52.17. This remnant vegetation is of particular importance as it provides both flora and fauna habitat and enhances local biolinks.

The vegetation in these areas also plays an important function in managing environmental conditions by providing habitat and biolinks, supporting soil stability, reducing stormwater runoff, limiting erosion and salinity and siltation of creeks and watercourses.

2.028/05/2015
C184**Vegetation protection objectives to be achieved**

To protect, and conserve existing vegetation as an important element of the character of residential areas in the Hills Townships by ensuring that this vegetation remains the predominant feature within the landscape.

To avoid and minimise the removal of vegetation where it assists in the management of environmental hazards such as erosion, salinity, siltation of creeks and watercourses, and stormwater runoff.

C161**Permit requirement**

A permit is required to remove, destroy or lop any vegetation. This does not apply if:

- It is an exemption listed at Clause 52.48 (Bushfire Protection: Exemptions).
- The vegetation is a tree overhanging the roof of a building used for Accommodation. This exemption only allows the removal, destruction or lopping of that part of the tree which is overhanging the building and which is necessary for fire protection.
- The vegetation is dead as a result of natural circumstances or as a result of the spread of noxious weeds and which have been assessed as being suitable for removal by an authorised officer of the responsible authority. This exemption does not apply to standing dead trees with a trunk diameter of 40 centimetres or more at a height of 1.3 metres above ground level.
- It is the minimum extent necessary to maintain utility services for the transmission of water, sewage, gas, electricity, electronic communications or the like, provided that the removal, destruction or lopping is undertaken in consultation with the responsible authority.
- It is necessary for maintenance by the Cardinia Shire Council of works including any road, drain, essential service or public facility.
- The vegetation is seedlings or regrowth less than 5 years old, the land has been previously been lawfully cleared and the land is being maintained for cultivation or pasture.
- It is the removal of any vegetation from an existing dam wall where the vegetation may impact on the structural stability of the dam wall.
- It is within 6 metres of an existing dwelling a lot less than 0.4 hectares.
- It is necessary for works associated with the normal operation of the Puffing Billy Tourist Railway as defined in the Schedule to the Public Use Zone under this planning scheme.

CARDINIA PLANNING SCHEME

- The vegetation is required to be pruned or lopped (but not removed or destroyed) as part of normal domestic or horticultural practice for the species.
- The vegetation is an environmental weed contained in the table below; that is not listed under the Schedule to Clause 43.01 (Heritage Overlay) and there is no condition listed in the table:

Botanical name	Common name	Condition
<i>Acacia baileyana</i>	Cootamundra Wattle	
<i>Acacia decurrens</i>	Early Black Wattle	
<i>Acacia elata</i>	Cedar Wattle	
<i>Acacia floribunda</i>	White Sallow Wattle	
<i>Acacia longifolia</i>	Coast/Sallow Wattle	
<i>Acacia saligna</i>	Golden Wreath Wattle	
<i>Acacia sophorae</i>	Coastal Wattle	
<i>Acer spp.</i>	Maple	Diameter at 1.3 metres above natural ground level must not exceed 40 centimetres
<i>Agapanthus praecox orientalis</i>	African Lily	
<i>Allium triquetrum</i>	Angled Onion	
<i>Alstromeria aurea</i>	Peruvian Lily	
<i>Amaryllis belladonna</i>	Belladonna Lily	
<i>Anredera cordifolia</i>	Madeira vine	
<i>Anthoxanthum odoratum</i>	Sweet Vernal Grass	
<i>Arbutus unedo</i>	Strawberry Tree	Diameter at 1.3 metres above natural ground level must not exceed 40 centimetres

<i>Zantedeschia aethiopica</i>	White Arum Lily	

Information Requirements

An application to remove, destroy or lop native vegetation must be accompanied by the following information. These requirements may be waived or reduced if in the opinion of the Responsible Authority, an information requirement is not relevant to the assessment of an application:

- A photograph or site plan (drawn to scale) showing the boundaries of the site, existing vegetation and the vegetation to be removed.
- A description of the vegetation, including any understorey to be removed, including the species, extent, number and size (diameter at 1.3 metres above natural ground level) of any trees to be removed and the Ecological Vegetation Class of native vegetation.
- Location of any hollow bearing trees.
- Topographic information, highlighting ridges, crests and hilltops, streams and waterways, slopes of more than 20 percent, drainage lines, low lying areas, saline discharge areas, and areas of existing erosion.
- A written explanation of the steps that have been taken to:
 - Avoid the removal of vegetation, where possible.
 - Minimise the removal of vegetation.
 - Any actions to contribute to the ongoing management of existing vegetation on the site.
 - Appropriately replace and/ or compensate the loss of vegetation, if required.
- A copy of any property vegetation plan that applies to the site.
- Where the removal, destruction or lopping of vegetation is to create defensible space, a statement explaining why removal, destruction or lopping of vegetation is required having regard to other available bushfire risk mitigation measures. This does not apply to the creation of defensible space in conjunction with an application under the Bushfire Management Overlay.
