Strategies

Facilitate the development of Portland as a regional centre for transport, logistics, agriculture, manufacturing and processing industries and employment.

Support the development of education and training facilities with a connection to existing and emerging industries within Portland.

Encourage the development of industries that process local products.

Support the adaptation of existing underutilised industrial sites in the North Portland Industrial Precinct.

Support the development of the fishing industry including the processing of product and the servicing of the fishing industry.

Support and develop the timber industry for employment and sustainable land management.

Encourage Portland to be developed as a hub for renewable energy research, design and manufacturing.
