SCHEDULE 2 TO CLAUSE 35.06 RURAL CONSERVATION ZONE

Shown on the planning scheme map as **RCZ2**.

CONSERVATION VALUES

Rowsley Scarp and foothills of the eastern edge of the Brisbane Ranges.

The Rowsley Scarp is a significant and visually prominent landscape feature forming the eastern edge of the Brisbane Ranges. The eastern edge of the Brisbane Ranges is noted for its landscape character and connection to the Rowsley Scarp.

The zone has been applied to conserve the landscape and vegetation qualities of the area by avoiding erosion and land degradation and maintenance of existing vegetation cover wherever possible. Further, for the flatter, cleared land, the outcome is to retain its existing landscape character and to maintain the buffer to the forested land of the Brisbane Ranges to the west and to minimise erosion potential and removal of soil.
