C141mith**SCHEDULE 9 TO CLAUSE 43.04 DEVELOPMENT PLAN OVERLAY**

Shown on the planning scheme map as **DPO9**.

**WALLAN SOUTH WEST DEVELOPMENT PLAN****1.0**19/12/2013  
C94**Requirement before a permit is granted**

The responsible authority may consider an application to construct a building or construct or carry out works prior to the approval of a development plan, provided the buildings or works do not prejudice the preparation and approval of the development plan.

The objectives of the Development Plan Overlay 9 are:

- Maximise the accessibility of pedestrian and cycle routes in providing links to the town centre and adjacent residential areas
- Locate public open space in convenient and prominent positions that contribute to the quality and character of key arterial routes, and promotes informal surveillance
- Provide a range of allotment sizes and to locate the various sized allotments in positions that are consistent with their performance capability
- Create high quality residential boulevards along the main access routes between the north and south and east and west
- Ensure the development integrates appropriately with the surrounding and adjoining land uses including future road networks

**2.0**19/12/2013  
C94**Conditions and requirements for permits****Commencement**

Except with the prior written consent of the responsible authority, the use of any building or part of the site must not commence until all landscaping, car parks and other works approved as part of the staged development plan have been completed to the satisfaction of the responsible authority.

**Staging**

The land must be developed in accordance with the provisions of an approved development plan. Each stage of development set out in an approved development plan must be completed to the satisfaction of the responsible authority.

In determining whether or not to approve a subsequent stage, the responsible authority must consider the following measures to ensure that any stage does not create a burden on the community or the responsible authority:

- The rate of allotment take-up
- The rate of dwelling commencement
- The resident profile
- General market forces

**Consideration of applications**

In considering any application within the area covered by this development plan, the responsible authority must consider:

- The purpose of the zone
- The amenity of the area
- Any approved development plan
- The provision of efficient and safe vehicular access

- Advice of the Environment Protection Authority, relevant water authority, Goulburn Broken Catchment Management Authority (Floodplain Management Unit), Roads Corporation and any other relevant statutory authority
- The proposed means of drainage, the likely impact of the development on the flow of water across the site and on the quality of water entering the Merri Creek drainage system
- The appearance of development from within the precinct from any nearby road, and from the Hume Freeway
- Any matter which the responsible authority considers will effect the character of the area
- Any other matter which, in the opinion of the responsible authority, is necessary to be considered in the interests of the residents of the area and the community generally

### **Subdivision requirements**

A permit is required to subdivide land. Applications must meet the following requirements:

- Compliance with a development plan approved by the responsible authority
- Each lot must be provided with a reticulated supply of water
- Each lot must be provided with a reticulated supply of electricity located underground unless special circumstances exist such as existing overhead electricity supply
- Each lot must be connected to a reticulated sewerage system and a drainage system
- Each lot must have access to a road constructed to the satisfaction of the responsible authority in accordance with its engineering guidelines

In its approval of any subdivision, the responsible authority may include any conditions considered necessary including a development contributions fee calculated to contribute towards the cost of community services, physical infrastructure and open space required by the subdivision and located either in the DPO9 area or elsewhere in the Wallan Township area. Any approval for subdivision may include a Section 173 agreement under the Planning and Environment Act 1987.

## **3.0**

19/12/2013  
C94

### **Requirements for Development Plan**

The detailed development plan must show:

- Road reservations, widths and alignments
- The number and size of allotments to be created
- The nature and use of all lots
- A comprehensive landscape plan
- An interface design response to the adjoining land that includes consideration of:
  - The relationship to existing or proposed land uses on adjoining land
  - Consideration of sensitive residential interfaces within adjoining low density residential land, where appropriate
  - Integration with existing vegetation, where appropriate
  - Future road networks surrounding the land and likely access arrangements
  - Active frontages to any proposed future roads surrounding the land and orientation of lots to avoid dwellings backing on to roads where possible

The responsible authority may approve a staged development plan which varies from an approved development plan provided that the variation:

- Is consistent with the general principles of the development plan and the purpose of the zone

## MITCHELL PLANNING SCHEME

- Does not adversely affect the implementation of the development plan
- In the opinion of the responsible authority, does not have an adverse environmental social or economic impact on the area or Wallan township
