C131mona**Design objectives**

To facilitate housing diversity and growth in the form of unit, townhouse and apartment developments of a high quality design and finish.

To promote the preferred garden city character by minimising hard paving throughout the site by limiting the length and width of accessways and limiting paving within open space areas.

To support new development that sits within an open garden setting and provides well located open space that allows for retention and planting of vegetation, including canopy trees.

To encourage development that minimises the impact on neighbouring residential interfaces by decreasing in scale towards adjoining properties and providing setbacks from adjacent secluded private open space that can accommodate the planting of screening trees.

To encourage development that contributes to a diverse and interesting streetscape, retains adequate sunlight to streets and public spaces and minimises building mass and visual bulk through landscaping and breaks and recesses in the built form.

**Decision guidelines**

The following decision guidelines apply to an application for a permit under Clause 32.07, in addition to those specified in Clause 32.07 and elsewhere in the scheme which must be considered, as appropriate, by the responsible authority:

- Whether the development provides an appropriate transition to built form on adjoining sites.
- The robustness of proposed materials and finishes.
- How vegetation in the front setback softens the appearance of built form and contributes to the public realm.
