**Waste and resource recovery**

**Strategies**

Encourage new development to incorporate innovative waste management approaches and technologies to reduce waste.

Integrate waste management and recycling facilities into new developments to reduce waste generation, encourage design for organic collections and divert more waste from landfill.

Require easily accessible recycling facilities on site to encourage use by occupants and facilitate ease of collection.

**Policy guideline**

Consider as relevant:

- A waste management plan for multi-dwelling developments.

**Policy document**

Consider as relevant:

- *Waste Management Plan – Guidelines for Planning Applicants* (Moonee Valley City Council, 2018)
