SCHEDULE 2 TO THE ENVIRONMENTAL SIGNIFICANCE OVERLAY

Shown on the planning scheme map as ESO2.

SIGNIFICANT LAKE ENVIRONS

1.0

19/01/2006
VC37

Statement of environmental significance

Lake Fyans and Lake Lonsdale are major water storages within the Wimmera Mallee Water Supply System. Much of the water within the lakes system services towns within the Grampians Region Water Authority District. Wimmera Mallee Water supplies domestic and stock water to more than 60,000 people and properties across the supply region. The security of supply and protection of lakes, channels and reservoirs from potential sources of pollution is critical to the operation of one of Victoria's largest water supply systems.

Decision guidelines

Before deciding on an application, the responsible authority must consider as appropriate:

- The need to prevent pollution of the lakes system which forms part of the regional water supply network;
- The need to prevent the contamination of water supply;
- The need to protect water supply resources;
- The desirability of locating any effluent or waste water disposal systems, or other potential sources of pollution at least 50 metres from Lake Fyans or Lake Lonsdale;
- The ability of any proposed effluent or other treatment system to prevent effluent or other waste affecting water quality in the lakes system; and
- The desirability of preventing the development of any buildings and works including dams within 20 metres of Lake Fyans or Lake Lonsdale.

Notification

Notice of all permit applications must be given in accordance with Section 52(1)(c) of the Act to the person or body specified as a person or body to be notified in Clause 66.06 or a schedule to that clause.
