Contaminated and potentially contaminated land

Objective

To ensure that potentially contaminated land is suitable for its intended future use and development, and that contaminated land is used safely.

Strategies

Require applicants to provide adequate information on the potential for contamination to have adverse effects on future land use if the subject land is known to have been used for industry, mining or the storage of chemicals, gas, wastes or liquid fuel.

Facilitate the remediation of contaminated land, particularly on sites in developed areas with potential for residential development.

Policy documents

Consider as relevant:

- *State Environment Protection Policy (Prevention and Management of Contamination of Land)*
- *Ministerial Direction No. 1 - Potentially Contaminated Land*
- *National Environment Protection (Assessment of Site Contamination) Measure* (National Environment Protection Council, 1999)
